Total responses/Total number of grads (Knowledge Rate)*

75/93 (81%) 33/34 (97%)

Methodology/Definitions

Timeframe (Master's Programs): An official program Graduate Survey is sent to all graduates just prior to graduation, and data is collected up to one year post graduation. Additional information is gathered from other sources, including faculty/staff, graduates' employers, social media, and verbal and email confirmation from graduates. This report includes one record per graduate with known placement status from either the official Graduate Survey or other source. If a graduate's placement status changes within the year following graduation, only their first reported record of employment, continuing education, or not seeking employment is included.

Timeframe (DPT Program): The Program graduates one cohort each year. The official DPT Graduate Survey is sent to all graduates six months to one year after graduation. Additional information is gathered from other sources, including faculty/staff, graduates' employers, social media, and verbal and email confirmation from graduates. This report includes one record per graduate with known employment status from either the official Graduate Survey or other source. If a graduate's employment status changes within the year following graduation, only their first reported record of employment or not seeking employment is included.

Knowledge Rate: The number of responses received from all aforementioned sources in relation to the total number of graduates

*DPT Program: Only graduates who have passed the licensure exam within one year following graduation are considered for this report, in accordance with CAPTE's employment reporting requirements.

Placement Rate (Master's Programs): The percentage of: total number of graduates employed (full-time, part-time, temp/seasonal) and not seeking employment from all sources / total number of graduates employed (full-time, part-time, temp/seasonal), not seeking employment, and seeking employment from all sources

Employment Rate (DPT Program only): Employment rate is defined by CAPTE as "the percentage of graduates who sought employment that were employed (full-time or part-time) as a physical therapist within 1 year following graduation" and is calculated as the percentage of: total number of graduates employed as physical therapists (full-time, part-time, temp/seasonal) from all sources / total number of graduates employed and seeking employment as physical therapists from all sources
